

Pressure Reducing Valve

RDD-3F

An automatic adjusting valve for maintaining the fluid pressure of a secondary side at a certain pressure value lower than the fluid pressure of a primary side, by adjusting, according to energy of the fluid flowing, the opening state of a valve.

Inlet Pressure	30kgf/cm2
Outlet Pressure	0.5~10kgf/cm2
Max Reducing Ratio	10 : 1
Working Temperature	Max 60℃
Working Fluid	Air, Water
Connection	JIS B 2210 FLANGE
Materials	Body: SC/BC/SCS
	Trim: Stainless steel / NBR
