

FTV-81 SIL

Silicone rubber coated sleeve

MONTERO Introduction

Fibras y Elastómeros S.A. as Spanish manufacturer of thermal insulation and industrial sealing products has established a worldwide distribution network of high temperature textiles, insulation and technical textiles.

Description of the product:

FTV-81 SIL silicone rubber coated sleeve is made from hollow sleeve, which is woven by texturized "E" type fiberglass yarn, and coated with silicone rubber. FTV-81 SIL has got excellent resistance to shed molten metal splash and intensive radiant heat, so that it can provide the perfect protection to the hoses, cable and wire rope in various hard environments. The working temperature of FTV-81 SIL can come to 500°F (260°C).
